The author realizes that this paper is still far from perfect, so the author will be very appreciative and enthusiastic, if colleagues and supervisors who have been deigned to provide suggestions and criticisms for this paper.

# SYSTEM ANALYSIS

## **System Summary:**

Moon Night Hotel Bogor is a 4-star hotel that stands majestically in the center of Bogor City. Moon Night Hotel Bogor is the second hotel under the Moon Light Hotel Group and has been open since February 18, 2018.

In this project, users can search for all information, such as hotel descriptions, hotel facilities, and the room types. this is why a good hotel reservation system is needed to make this task as easy as possible. This paper shows how the noted complicated human task can be solved by using a database Management System together with scripting and programming languages like HTML respectively as the key tools in the development of a Moon Night Hotel System.

## INTRODUCTION

In our 3rd project, we created a simple website entitled "Moon Night Hotel". This website is the same as other hotel websites, the Moon Night Hotel website has a lot of content about hotels in it. There is a choice of Home, various types of Rooms, types of Food and Drink, Weddings (info about the building, decor references, and package prices) , Offers contains numbers or contacts that can be contacted to order, Location, and the Booking Now Form. When the booking form is filled in, at the end you will see the input amount of the order.

## ACTIVITIES LIST

No	Date	The Progress
1.	July 1, 2022	Design the website layout
2.	July 2, 2022	Discuss website Content
3.	July 4, 2022	Start making web syntax
4.	July 5, 2022	Create web syntax
5.	July 5, 2022	Create paper
6.	July 6, 2022	Create web syntax, consul, and complete paper
7.	July 7, 2022	Create PowerPoint and record video
